

Billy the Hospice Squirrel is missing his friends. While we're all safe at home why don't you help Billy the Hospice Squirrel find out what his wildlife friends are up to in your area. What can you spot from your window, while out exercising or in your garden?

You can use this pack to help you keep a record of what you've spotted. If you get your friends involved you can also find out what they've seen!

Don't forget to share what you've seen, your drawings, stories or photos on Billy's Wildlife Watch facebook page.

What have you seen? It could be birds, mammals (including pets), insects, butterflies and moths, trees, flowers, amphibians, fish or reptiles.

What did you see?	Where did you see it?	When did you see it?

What have you seen? Why not draw it in the box below, or you can draw how you found it (with your family, on your own, while out exercising etc.)
